DETAILED ACTION

Drawings

The drawings were received on 11-24-04. These drawings are accepted.

Allowable Subject Matter

Claims 1-19 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art taken alone or in combination fails to anticipate or fairly suggest the limitations of the claims, in such a manner that a rejection under 35 USC 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 1, 13 and 17.

Specifically regarding claims 1 and 17, Afshari (5828502) teaches the state of the art of optical bench system.

But, Afshari fails to explicitly teach ball bearings having contact points with respective of the first and second rails, the contact points lying on at least a first line of travel on one of said first and second rails and at least a second line of travel for carriages on the other of the first and second rails and said lens assembly including an optical axis parallel to the Z-axis and said lines of travel, but spaced apart from the lines of travel so that said optical axis and all lines of travel lie on a common plane, as claimed.

Specifically regarding claim 13, Afshari (5828502) teaches the state of the art of optical bench system.

Art Unit: 2873

But, Afshari fails to explicitly teach d) a box structure support secured to said carriages; e) said box structure support including a front structure, a rear plate and first and second side members joined to said front structure; f) said rear plate providing a platform for supporting a component of the optical inspection system, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
